

1. 🏠 Home Icon (Dashboard Overview)

- **What it represents:** The main landing workspace.
- **What happens when clicked:**
 - Instantly resets your view back to the primary dashboard shown in the image.
 - Displays top-level summary metrics (Active Projects, Mentoring Hours Logged, Pending Reviews).
 - Shows quick-access cards for active projects, the office hours calendar, and the live review desk.

2. 💳 Credit Card / Wallet Icon (Escrow & Funding Milestones)

- **What it represents:** Financial tranche verification and project escrow tracking.
- **What happens when clicked:**
 - Opens the **Corporate CSR Grant & Escrow Ledger**.

- Shows how much money your company has pledged versus how much has been released to the university lab.
- Displays milestone payment breakdowns (e.g., *Tranche 1: ₹75,000 Released upon Prototype Approval; Tranche 2: ₹1,00,000 Locked in Escrow pending Field Test*).
- Allows mentors to view expenditure summaries uploaded by the university (Bill of Materials receipts, sensor purchase invoices).

3. **Group / People Icon (Lab Teams & Faculty Directory)**

- **What it represents:** People management and direct stakeholder contacts.
- **What happens when clicked:**
 - Opens the directory of all researchers and professors working on your assigned projects.
 - Displays team member profiles, their academic qualifications, university department, and specific roles in the project (e.g., *Faculty Guide, Embedded Systems Researcher, Machine Learning Specialist*).
 - Provides quick-contact options (send direct message, view researcher publications, or flag a standout researcher for corporate internship/hiring).

4. **Clipboard / Briefcase Icon (Assignments & Technical Tasks)**

- **What it represents:** Milestone deliverables and engineering task boards.
- **What happens when clicked:**
 - Opens a **Kanban board / Task tracker** (similar to Jira or Trello) specific to the technical roadmap.
 - Lists tasks divided into columns: *To Do, In Lab Testing, Awaiting Mentor Review, and Completed*.
 - Mentors can create actionable technical tickets here (e.g., *"Re-test voltage regulator under 45°C ambient temperature"* or *"Provide calibration curve for turbidity sensor"*).

5. **Refresh / Sync Cycle Icon (Active TRL & Revision History)**

- **What it represents:** Technology Readiness Level (TRL) auditing and version history.
- **What happens when clicked:**

- Opens the **Project Version & Audit Log**.
- Shows the chronological engineering changelog: every schematic update, firmware commit, and test failure/success log submitted by the university.
- Displays the formal TRL audit trail: shows how the project moved from TRL-3 (Analytical PoC) to TRL-4 (Lab Testing) to TRL-5 (Component Validation), verifying compliance before municipal deployment.

6. **Gear Icon (Settings & Availability Preferences)**

- **What it represents:** Account configuration and mentorship parameters.
- **What happens when clicked:**
 - Opens **Mentor Settings & Office Hours Configuration**.
 - Configure your weekly availability calendar (e.g., set recurring mentoring slots: *Fridays 3:00 PM – 5:00 PM*).
 - Set domain expertise tags (e.g., *Embedded Firmware, Structural Engineering, Water Filtration*) so the platform pairs you with relevant challenges.
 - Manage notification preferences (choose whether to receive email/SMS alerts when a lab submits a milestone for review).

7. **Bottom Exit / Logout Icon**

- **What it represents:** Secure session sign-out.
- **What happens when clicked:**
 - Prompts a confirmation dialogue to save any unsaved review drafts.
 - Safely logs the mentor out of the corporate portal session, ensuring proprietary project schematics and evaluation data remain confidential.

What Each Feature Does on This Screen

- **Interactive CAD & Circuit Viewer (Left Side):**
 - The mentor zooms into uploaded schematics, firmware code snippets, and sensor stress graphs without downloading raw files to their machine.
 - Mentors can click on specific circuit components to leave redlined sticky-note annotations.
- **Rubric Scoring Criteria (Top Right):**
 - Mentors score the build across core engineering parameters (*Technical Feasibility, Durability, Cost-Efficiency*).
 - These scores automatically inform the project's **TRL (Technology Readiness Level)** progress bar.
- **Lab Video Demo & Test Proof (Middle Right):**
 - Mentors review university-uploaded validation videos proving the prototype survived bench tests.
- **The Dual Decision Gate (Bottom Right):**
 - **Option A: "Send Revisions to Lab" (Orange Button):** Re-opens the milestone ticket, locks funding, and notifies the faculty guide to fix the flagged flaws.

- **Option B: "Sign-Off & Authorize Escrow Tranche" (Green Button):** Digitally approves the milestone. This triggers the platform's backend escrow to release the next tranche of CSR grant money directly to the university's lab account.

- ❓ **Interactive Royalty Sliders:** Live linked sliders showing the percentage cut between the Host University and Corporate Sponsor, constrained by national NISP policy guardrails.
- ❓ **Compliance Badge:** A verified policy badge certifying minimum institutional IP protections and inventorship recognition before the deal can proceed.
- ❓ **Dual DSC Execution:** Clear status indicators tracking institutional and corporate Digital Signature Certificate (DSC) approvals.
- ❓ **Counter-Offer Desk:** Allows either party to adjust terms and submit counter-proposals directly within the portal.
